

## VERTICAL LOADING CASE PACKER

**VECTRA** is OMET's **vertical loading case packer**, fully servo-assisted and designed to meet the different production requirements of the market.

It can handle products of different shapes and sizes and, thanks to anthropomorphic pick-and-place systems, offers **extensive customization possibilities**. Fast format change and management of multiple configurations ensure precision, flexibility, and continuous operation.

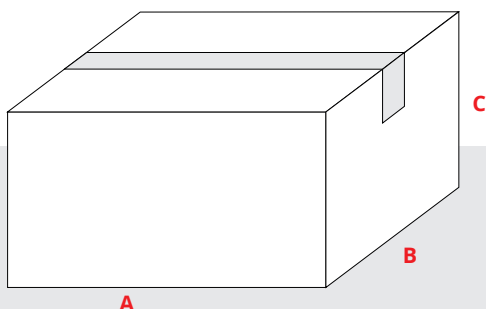

**VECTRA:**  
compact and flexible  
vertical loading case packer,  
designed to handle various  
products with precision and  
continuous operation.

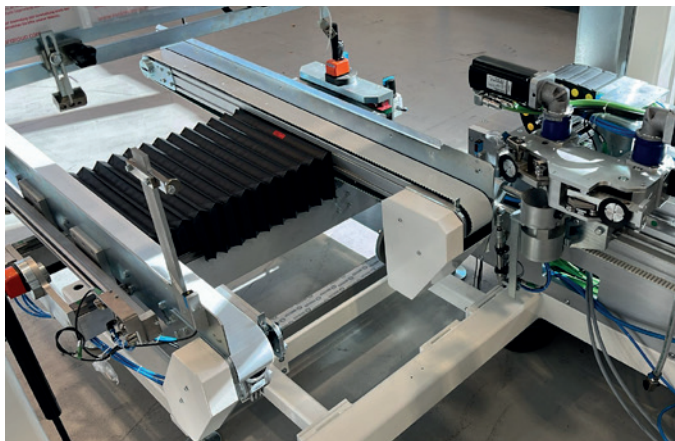

### PERFORMANCE / TECHNICAL DATA

	LENGTH (A)	WIDTH (B)	HEIGHT (C)
Min.	200 mm	150 mm	150 mm
Max.	600 mm	400 mm	500 mm
Maximum speed	Up to 20 boxes/min		

Technical data contained in this sheet are not binding.  
OMET is entitled to change the features of the products without prior notice.

The above dimensions refer to standard machine configuration.  
Any modifications outside the standard limits are available on request.

## UNIQUE FEATURES

### EFFICIENT VERTICAL LOADING

- Vertical loading to **optimize line space** and simplify product insertion
- Quick setup and fast format changeovers to minimize downtime

### PRODUCTIVITY AND CONTINUITY

- Up to 20 cartons/minute**, ensuring continuous operation and reduced stoppages
- Servo-assisted** for consistent, precise, and reliable performance

### VERSATILITY AND CUSTOMIZATION

- Compatible with **anthropomorphic pick-and-place systems** to handle products of various shapes and sizes
- Flexible** and easily integrated into existing lines

### OPERATIONAL EFFICIENCY

- Optimizes production time and ensures **process continuity**
- Suitable for different production configurations, guaranteeing **constant precision and quality**

## GREEN APPROACH

VECTRA can be configured to further reduce costs and waste by integrating solutions to bypass primary packaging, allowing direct case packing of loose products from upstream machines.
