XV LINE
OMET

THE HIGH PRODUCTIVITY TISSUE LINE

The OMET solution with folding groups based on mechanical technology specifically developed to drastically increase the production capacity and the efficiency.

The new XV Line is the revolutionary machine specifically designed by OMET in order to increase the production capacity and the efficiency of the entire transformation process, thus also eliminating the need to go through a slitter for cutting into small-end reels. This line is the result of a careful technological research with innovative and patented operating principles that allow for an **absolute modularity** of the machine itself.

Unlike other high-production lines, with a vacuum technology, OMET, the leading company in the production of mechanical folding units, brings all the advantages of this latest technology in terms of quality and speed, even on large-range machines.

The name that OMET has chosen for this new line fully reflects its main feature: a high productivity line capable of producing an eXtra Volume of napkins.

In fact, the machine can reach 25,000 pieces per minute.

One of the main features of this innovative line is **versatility**, a peculiarity that occurs throughout the entire range of OMET lines, thanks to which it is possible to produce napkins with **different formats**.

At the same time, the modularity and customization features of the product, also available on all OMET machines, are also part of the composition possibilities of the new XV Line.

The machine is fully automated and easy to use for the operator, with an intuitive and essential interface.

Continuous technological development, servo motors and advanced digital controls are present on the line to ensure maximum performance, reliability and production efficiency.

PERFORMANCE / TECHNICAL DATA

Open format min.	210 mm
Open format max.	430 mm
Pack height	70 - 250 mm * (* Maximum height constrained by pack stability)
Number of lanes	From 4 to 14
Max. continuous output	Up to 20 pack/min per lane

Technical data contained in this sheet are not binding. OMET is entitled to change the features of the products without prior notice.

XV LINE

the ideal solution for high productivity converting

XV LINE UNIQUE FEATURES

QUALITY AND EASE OF USE

The XV Line embodies the essential requirements that have always been sought by the user: high product quality levels, ease of use and easy maintenance.

GREEN APPROACH

The elimination of the vacuum helps to make the machine even greener, reducing energy consumption.

VERSATILITY

It is a multi-format line with a quick-change cassette system for the folding unit.

ADVANCED TECHNOLOGY

To complete the machine, all the control technologies developed by OMET in recent years are present on the XV Line, such as vision systems and automatic register controls.
